

## Advanced Technical Services Automotive Electronic Remanufacturing Services

**Providing OEM support solutions to the Automotive industry since 1981**

Advanced Technical Services ISO-9000 certified automotive electronics remanufacturing solutions are engineered to meet the highest standards of quality, delivery and cost to support the ever increasing demands of our automotive customers.

The ATS Repair team is committed to delivering the highest level of customer satisfaction throughout the repair process and offers a variety of equipment remanufacturing, repair and logistics solutions designed to minimize equipment downtime and keep vehicles on the road.

Advanced Technical Services automotive support solutions include; a dedicated in-house technical staff for faster repair cycle times, advanced exchange and vendor managed inventory programs to eliminate backorders at automotive dealers or parts distribution centers and warranty screening and sorting programs to free up internal customer resources and make certain critical automotive components are available when and where they are needed most.

### Certified and Trained Technical Staff

Since 1981, ATS' teams of highly skilled engineers, technicians, and component replacement specialists have supported the needs of major Automotive OEM's. Since the company's inception, the ATS technical staff has repaired over 5,000,000 electronic products for their customers.

## Your Single Point of Contact for Automotive Component Test and Repair Needs

Advanced Technical Services experienced remanufacturing solutions team allows our automotive customers to have a single point of contact for their automotive component remanufacturing, test and repair needs.

Advanced Technical Services Warranty Verification Program can simplify your remanufacturing process by managing all component returns through a single source. In this process ATS receives defective products directly from the field, determines warranty status and either repairs defective components internally or manages the repair process thru the appropriate approved OEM vendor. ATS Warranty Verification and Remanufacturing programs allow our automotive customers to focus their internal resources on important corporate initiatives while ATS manages their electronic component remanufacturing needs.

ATS provides multi-vendor component repair across audio, instrument and display, drive train, HVAC and wireless systems. Advanced Technical Services experienced equipment repair specialists provide industry-leading quality, cycle time, and the highest repair yields of any repair provider. ATS offers a variety of service options from dealer direct advance exchange programs to high volume focused site solutions.
